

EL/AZ Positioners - Medium Duty

AL- 4271-1 • AL- 4272-1 • AL- 4273-1 • AL- 4274-1 • AL- 4275-1

The MVG-Orbit/FR Legacy Series EL/AZ Positioners provide accurate, balanced rotation, and controllable velocity of 2 axes, for the positioning of medium sized devices in test configurations. Their rugged yet straight-forward construction ensures maximum reliability and trouble-free operation, yielding the best size and weight/performance ratio.

Typically, the unit includes the body, precise slew bearings, a DC motor, gear reducer, encoder/synchro, and limit switch assembly. The turntable surface is designed with a threaded mounting hole pattern for ease of use. A Safe/Operate switch is included to ensure safety.

AL-4272-1

Applications

- General purpose positioning subsystems
- Far-field & near-field antenna measurements
- Indoor & outdoor use

Product Highlights

- Broad selection – 6 models
- Vertical loads ranging from 1,000 to 10,000 lbs (450 to 4,540 kg)
- Platform sizes ranging from 12.6 x 13.3 in to 28 x 28 in (320 x 339 mm to 711 x 711 mm)
- Excellent angular position accuracy
- Low backlash design
- Precision bearings
- Closed loop servo control
- Industry-standard wiring
- Tachometers for optimum speed Regulation & control
- Wide operating temperature range: - 4° F to 140° F (- 20° C to 60° C)
- Fully enclosed design of drive gear train & data take-off
- Wide variety of available options

Specifications - Legacy Series EL/AZ Medium Duty Positioners

Technical Notes

- 1** All accuracy data is based on no-load conditions.
Contact MVG-ORBIT/FR for accuracy under load conditions
- 2** All models are equipped with adjustable limit switches capable of approx 20° to 900° total travel in AZ axis. When rotary joint and slip ring options are specified, limit switches remain but are electrically disabled. Limit switches are factory-set at:
 - Elevation Axis: 190° (± 95°)
 - Azimuth Axis: 400° (± 200°)
- 3** Slip ring option :
 - Certain slip ring options may require an extension cap that protrudes above the turntable surface. Positioner height may increase. Consult MVG-ORBIT/FR
 - Slip ring contacts are provided with dedicated connectors
- 4** For EL axis : SL001EL; for AZ axis : SL002AZ
